Professional Experience

Senior UI Engineer Top Quadrant Raleigh, NC 2017-2017

Responsibilities:

- Worked with fellow UI developers to design and build improvements into the TopBraid Data Governance application.

Software Development Engineer 3, Scrum Master, Team Lead Lulu Press
Raleigh, NC 2009-2017

  Responsibilities:
- Served as Scrum Master, ensuring that project processes were observed and ensured that Scrum Teams were giving all opportunities to succeed.
- Acted as team lead, specifically with regards to User Interface development and design. This meant ensuring that standards in coding practices were observed and integrated.
- Served as Technical Release Manager in charge of ensuring code is packaged and recorded prior to release into test and production environments.
- Built and maintained the UI for the Lulu eCommerce system which included the Shopping Cart and entire Checkout flow.
- Developed and maintained a content management system for use by the Marketing teams using the Joomla! CMS and PHP. This included the addition of content migration features, templating, language selection and traffic routing built with the Joomla! API. In addition, built and maintained a SilverStripe CMS instance as well for LuluJr.
- Created HTML, OmniGraffle, and Photoshop mockups for user interfaces.

Associate Software Development Engineer Peopleclick Raleigh, NC 2006-2009

  Responsibilities:
- Maintained and developed front end product solutions using Freemarker templates, HTML, CSS, JavaScript, and MSSQL.
- Created HTML mockups for web-based user interfaces using industry standard coding practices in HTML, JavaScript, and CSS.
- Maintained a presence as the "go-to guy" for all related web development questions as it applied to the above standards and compliance.

IT Specialist / Web Development WebInsights Inc. Raleigh, NC 2005-2006

  Responsibilities:
- Created web applications using PHP, PERL, CSS, HTML, and JavaScript that outline client needs.
- Bridged MySQL, Postgres, Oracle, and MSSQL databases using PHP and Perl.
- Maintained code and database applications run on Apache Web Server.

IT Specialist / Web Development PhysioMetrics Inc. Mount Laurel, NJ 2002-2005

  Responsibilities:
- Developed module based code for the company web site using PHP, MySQL, CSS, HTML, and JavaScript.
- Supported and maintained a basic Apache Web Server configuration for the company intra-net.
- Supported and maintained the company in-house software.

- Provided phone and technical support for field personnel.
- Designed and implemented logistical plans to provide field personnel with supplies and equipment.

Education

Web Development and Business Programming, Diploma with Honors, 2002, (GPA 3.8), The Chubb Institute of Cherry Hill, Cherry Hill, NJ
- Created practical, customized business solutions in Java and Visual Basic.
- Obtained a solid skill-set in the design of new programs and algorithms.
- Achieved a qualified education in a wide range of technical systems, tools, methodologies, and languages.
